PROFESSIONAL SUMMARY

Lead Software Engineer and **Software Architect** with 9+ years building systems for finance, insurance, and public utilities. I turn complex requirements into software that meets business goals. I take products from idea to production: microservices that handle high load, banking systems that meet security standards, logistics platforms that track in real time. I run Agile teams, ship on schedule, and help engineers grow. Open to fully remote roles (contractor/B2B or EOR) with async-first communication.

CORE COMPETENCIES

Strategic Leadership: Technical Delivery Management, Strategic Planning, Stakeholder Relations, Agile/Scrum Mastery, Team Mentorship & Development.

Tech Stack: Node.js, TypeScript, React, Python (Django/FastAPI), Java (Spring Boot), PHP (Laravel), Go.

Architectural Design: Microservices Architecture, Event-Driven Systems, API Ecosystem Management, Scalable System Design, Database Modeling (SQL/NoSQL).

DevOps & Infrastructure: CI/CD Pipeline Automation, Docker/Containerization, AWS/GCP Cloud Infrastructure, Security Compliance, Performance Tuning.

REMOTE READINESS

Timezone: UTC+7 (Jakarta) — live overlap with Singapore, India, and the Gulf; evening overlap with UK/EU; async-first with US/Canada.

Engagement: Open to full-time remote roles as a contractor (Deel/Wise/Payoneer) or via EOR. Available immediately.

Working Style: Written specs, documented decisions, and PR-based reviews. Daily English across Slack, Jira, Confluence, and GitHub.

Home Office: Dedicated workspace, stable broadband with LTE backup, quiet setup for calls.

PROFESSIONAL EXPERIENCE

PT Pam Jaya (Jakarta Water Utility)

Jan 2025 – Oct 2026 · Contract completed

Lead Software Engineer

Led Jakarta's water utility (BUMD) digital upgrade. The work improved service for millions.

- Set the roadmap and shipped utility systems for real-time water distribution and tanker logistics (Mobil Tangki SDD).
- Connected business and engineering. Aligned architecture with long-term ops needs and held 99.9% uptime.
- Built CI/CD pipelines that sped up deploys without breaking reliability.

Bank Syariah Indonesia (BSI)

2023 – 2024

Lead Software Engineer

Owned core digital assets for Indonesia's largest Sharia bank. Served a large customer base with secure products.

- Built high-traffic banking portals and internal modules. Met Sharia and OJK compliance 100%.
- Rebuilt core transaction engines for lower latency and better scale.
- Mentored 15+ developers. Set code review standards and taught secure-by-design habits.

PT Bank Sinarmas MSIGLIFE

Jan 2021 – Dec 2022

Senior Backend Developer

Built core backend for a leading life insurer (JV with MSIG Japan).

- Decomposed a monolithic platform into scalable microservices with Java Spring Boot.
- Integrated bancassurance partner APIs for real-time policy issuance.
- Hardened data security for customer financial data and met international insurance standards.

PT Enigmacamp Cipta Humanika

Jun 2019 – Sep 2021

Technical Lead & Backend Specialist

Ran technical delivery for an IT talent incubator and consulting firm.

- Owned the lifecycle for client projects from e-commerce to internal systems.
- Built Enigma Camp 2.0, an LMS that handled thousands of concurrent students.
- Standardized backend workflows. Lifted developer output 30%.

Bank Permata

Jan 2018 – Dec 2019

Fullstack Web Developer

- Shipped web products for FMCG and finance clients with React and Java.
- Worked across design and backend to build responsive interfaces backed by solid logic.

Walden Global Service (WGS)

Jan 2017 – Dec 2018

Backend Engineer

- Built and ran high-concurrency web apps with PHP (Laravel) and Vue.js.
- Tuned databases and servers to handle peak e-commerce traffic.

EDUCATION

Universitas Komputer Indonesia (UNIKOM)

Graduated April 2017

Bachelor's Degree in Software Engineering

Graduated with a focus on Software Architecture, UI/UX, and Data Systems.

LANGUAGES

English — Professional working proficiency: async writing, documentation, and stakeholder calls.

Indonesian — Native.

KEY PROJECTS

PAM Jaya Mobil Tangki SDD:
Real-time water-tanker dispatch for PAM Jaya: live assignment monitoring, queue management, and inventory tracking.

PAM Jaya Mobile Driver:
Android app for PAM Jaya drivers. Live GPS, geotagged photos, and offline sync verify each delivery.

Bank BSI Digital Portal:
Portal for Indonesia's largest Sharia bank. Secured and tuned for high traffic.

Enigma Camp 2.0 (LMS):
Training platform for Enigma Camp. It handles thousands of concurrent students and their evaluations.
